## Neuro-Developmental Program

with

## Dr. Leah Light

### Strengthening Brain Connections for Academic and Social Success!

You are invited to attend a free informational session about a revolutionary new program called **BrainWoRx**, which is now being offered to the students of APA. Dr. Light will explain her program and answer any questions parents may have during this informative talk.

The purpose of this program to promote each child's brain development and learning potential through fun yet challenging exercises that incorporate sensorimotor, vision, hearing and speech-language skills in a play-like atmosphere. Using a variety of multi-tasking activities, children will be positively guided to perform tasks that will help automate functions of moving, seeing, hearing, and speaking. It is only when these skills are truly automatic, that higher order learning, thinking and reasoning skills are free to develop.

Children attend the **BrainWoRx** Program for a total of 6 consecutive weeks, for two hours a day, after school at APA. The program will run from **April 26<sup>th</sup> until June 4<sup>th</sup>**.

Results of previous **BrainWoRx** programs have shown significant improvements on standardized test measures. Specifically, there was:

- A 29% improvement in Motor Functioning.
- A 36% improvement towards integrating Primitive Reflexes.
- A gain of over 3 years in Visual Processing (which is instrumental for reading and writing).

There will be two informational sessions. The first one will take place on **Thursday, March 4<sup>th</sup> at 6:00 PM at APA**. The second one will take place on **Wednesday, March 10<sup>th</sup> at 3:30 PM at APA**. Please RSVP to [info@brainchildsinstitute.com](mailto:info@brainchildsinstitute.com) or call (954) 987-8887 and let us know which session you will be attending. We look forward to meeting with you and sharing this exciting and transforming new program.

Sincerely,  
The BrainWoRx Team
